Who we are

Our ethos is centred around quality first, speed to market and innovation. As market leaders, with over 50 years' experience in label packaging, our team has an unwavering determination for quality.

Rapid Labels provides Zebra Healthcare Technology Solutions that integrate hospital wristband printers, label printers, mobile computers and barcode scanners designed specifically for the healthcare environment.

Our longstanding relationship with Zebra Technologies and our Zebra Printers Premium Partner status gives us full access to Zebra solutions and parts. We have an in-depth knowledge of Zebra products, stock holdings and our in-house service offer makes Rapid Labels the go to choice for innovative Healthcare Solutions.

At Rapid Labels, our approach to the Healthcare industry is comprehensive. We provide medical professionals with a suite of innovative Zebra Healthcare

Solutions, printer ribbons, as well as custom healthcare labels for pharmacy, laboratories and phlebotomy.

Our Bureau Team provide quality end-to-end customer service with our full service offering – on-site or return to base, which sets Rapid Labels apart from companies who only offer box-drop services.

It all starts at the wrist

Patient identity management

Patient wristbands are the foundation for a safer, more efficient process; delivering care and durability. The **ZD510-HC** Wristband printing solution combines the reliable **ZD510-HC** printer with easy-to-load cartridges containing the only antimicrobial-coated wristbands on the market – Zebra's **Z-Band®** wristbands.

The **ZD510-HC** printer offers comprehensive connectivity options, a disinfectant-ready UV-resistant housing and the powerful Print DNA suite of applications, utilities and developer tools, increasing staff productivity and patient safety.

The **Z-Band®** wristbands are one of the most durable thermal wristbands available. Designed, produced and rigorously pre-tested, they offer optimum image durability and scanning performance as well as being resistant to hand sanitisers. Zebra's **Z-Band®** wristbands are durable, latex free, hard wearing, antimicrobial and they are the softest direct thermal wristbands on the market.

Zebra's **TC52x-HC** mobile computer is the most advanced purpose-built enterprise solution for healthcare. Featuring a large full HD display, video streaming, secure text messaging, mobile alarms and alerts, flawless 1D/2D barcode capture, optimised voice capabilities and a disinfectant-ready design, the **TC52x-HC** delivers the ultimate in touch computing for today's healthcare workers.

Versatile, rugged, resilient performance *ET40-HC tablet*

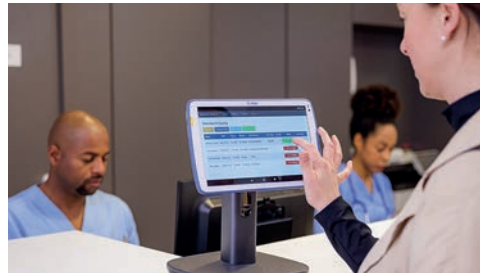

The **ET40-HC** provides several enterprise healthcare features which include Tele-Health capabilities, access and updates to electronic health records, the ability to receive patient medical alarms, alerts and reach co-workers. From nurses and physicians to lab technicians and patient transport, call for immediate help and so much more, this tablet provides it all.

Inside waiting rooms, use the **ET40-HC** in the presentation stand to create a self check-in kiosk. Bedside in patient rooms, the **ET40-HC** provides patients with access to communicate directly to housekeeping and food service for non-emergency needs.

The tablets can also improve the quality of care and the patient experience, enabling patients to communicate an urgent need or concern to a nurse, place a dependable video call to visit with family, or use the **ET40-HC** as an in-room television.

This incredibly versatile tablet is built to meet the demands of Healthcare.

Our holistic approach to Healthcare
*Thermal printers, ribbons, maintenance
 and service solutions*

Our technical label experience combined with our **thermal printer solutions** makes Rapid Labels the best option as an overall provider. Look to us to streamline your healthcare technology needs with the wide array of Zebra Healthcare products we provide.

In addition to hardware and labels, we also stock genuine **thermal transfer ribbon brands** for healthcare desktop and tabletop printers and our printer sales team can help you figure out whether a wax, wax-resin or resin ribbon is appropriate for your application.

Our **Preventative Maintenance Service** can be provided on-site or via our return to base service. We ensure that your thermal printer functions to the best of its ability with dust and debris cleaning, printer maintenance services and parts replacement.

Talk to us for more information about our **RapidCare** Service Level Agreement.

Pharmacy labels

Keep it all under one roof

Self-adhesive labels, barcodes, sequential numbering and variable print solutions

Rapid Labels has label materials and adhesives that are specifically designed for the Healthcare Sector.

We provide high performing label materials with adhesives that can withstand extreme **low cryogenic temperatures** and **steam autoclave sterilisation** as well as materials for **small diameter medical services**.

From **cryogenic, laboratory, pathology** and **3-part pharmacy dispensary labels** through to **self-adhesive blank labels** – ex stock or custom sizes. Our wide range of label materials offer solutions with the appropriate face stocks and adhesives to suit your labelling requirements.

We produced millions of **COVID Testing Sequential Barcode labels**, which included the set up and management of the number sequences for each print run, and supplying the labels to the entire network – managing the stock and distribution to GPs and DHBS throughout New Zealand. This was made possible with our **digital labelling solutions** which provide flexibility and bespoke labels for printing on demand.

And our in-house **Overprinting Bureau** offers pain-free overprinting services with a fleet of dedicated **Zebra thermal printers** ready to overprint pre-printed labels with batch codes, best before dates, sequential numbering, 1D/2D barcodes and all other variable data required before label application.

ZQ610-HC mobile printer

DS8178-HC handheld scanner and USB cradle

Point of care services

Mobile printers and handheld scanners

Delivering outstanding care at patients' bedsides, the **ZQ610-HC** mobile printer improves accuracy and patient safety by completing specimen labelling at the point of care. It delivers advanced technology in an innovative and portable design and takes productivity, ease-of-use and manageability to a new level. Ideal for use in Blood Bank Management and breast milk labelling too.

Zebra provides premium, unparalleled performance with the **DS8178-HC** and **DS2208-HC** handheld scanners. These can be used to admit patients, administer medication, collect specimens or perform inventory management.

Both the healthcare **mobile printers** and **handheld scanner** options feature

Bedside medicine administration with the DS8178-HC handheld scanner

Bedside specimen collection with the ZQ610-HC mobile printer

disinfectant-ready housing designed to handle regular sanitising with popular disinfectants to help prevent the spread of infection and comply with hospital or government regulatory cleaning protocols.
